

You`ll never walk alone!

Trautmann

A feeling for feet since 1889

The Trautmann feeling for feet

It is our feet that carry us throughout our lives. They are literally a basis for life and therefore vital for our sense of well-being.

The entire body is linked to the feet: back pain, tension in the neck and shoulders and even knee problems have a lot to do with the feet.

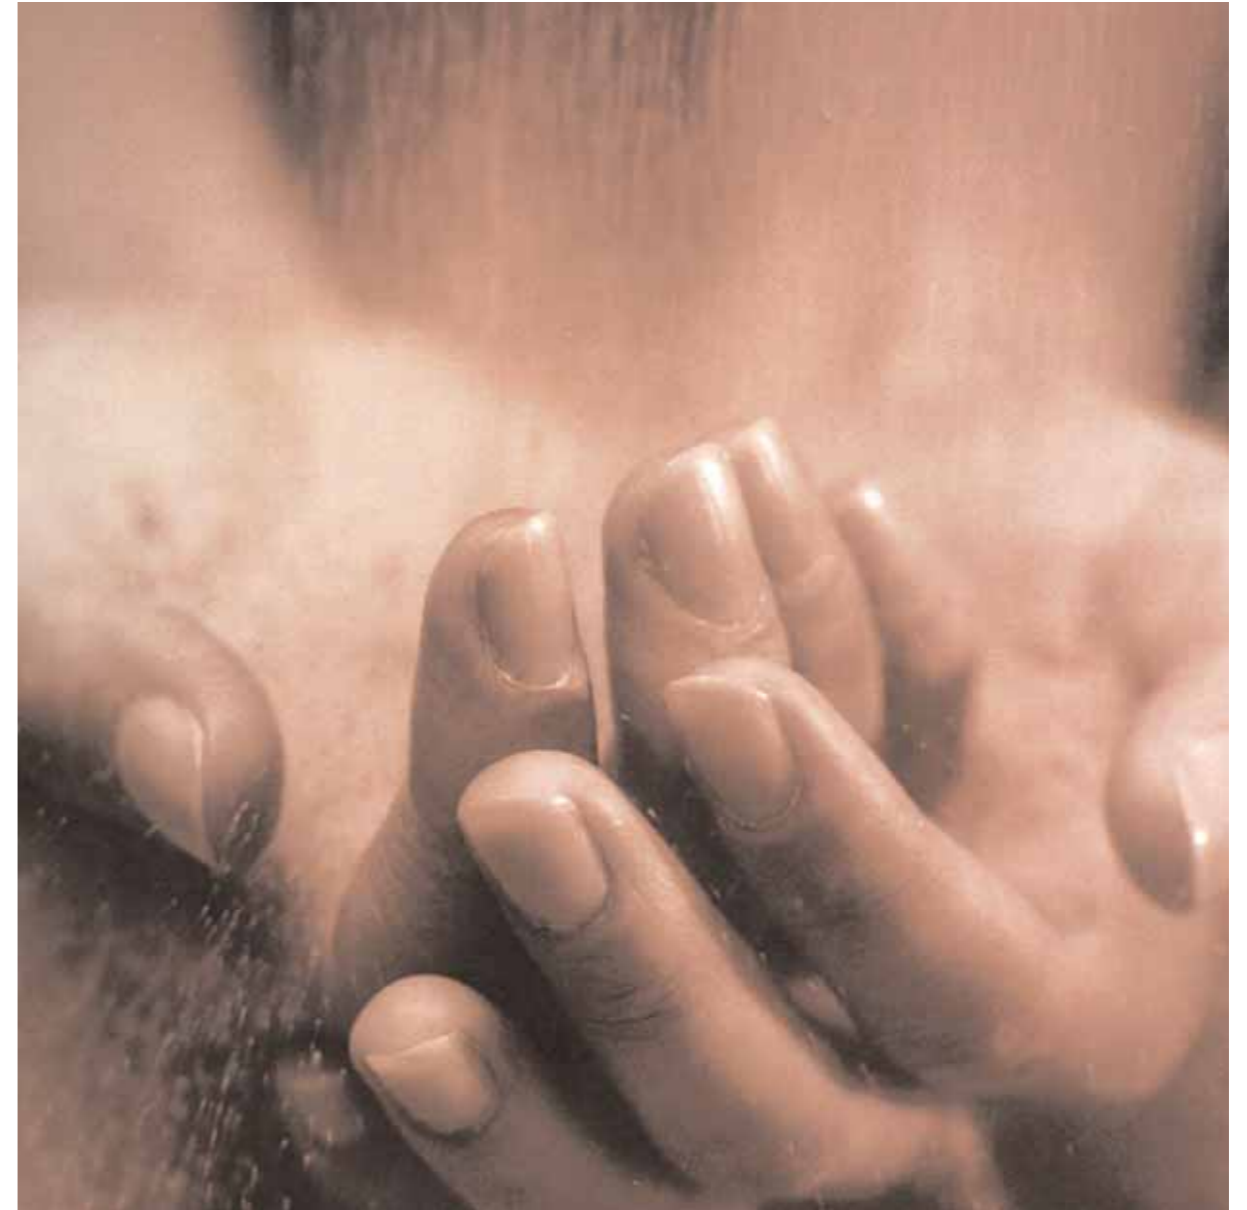

For this, Trautmann – the experts for foot health and fitness – has just the right touch.

Wherever there are problems with or because of the feet, we are there to provide you with professional support. We develop tailor-made insoles or special shoes so that you can simply walk away from pain and discomfort.

With Trautmann you'll never walk alone.

With our three lines of business

– foot care, sports orthopaedics and comfort and special shoes –
we will give you a new feeling for life.

Our clients are active

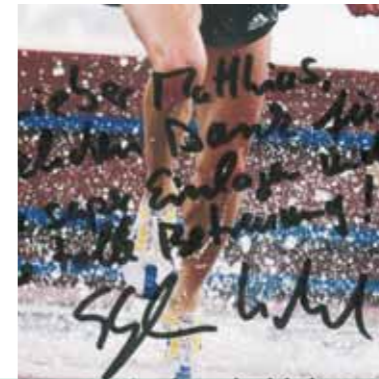

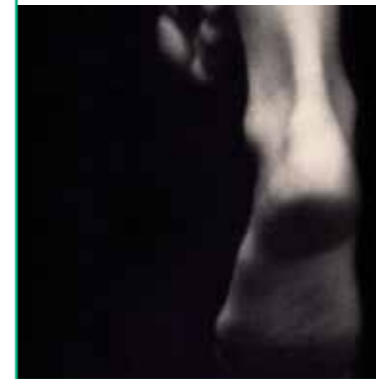

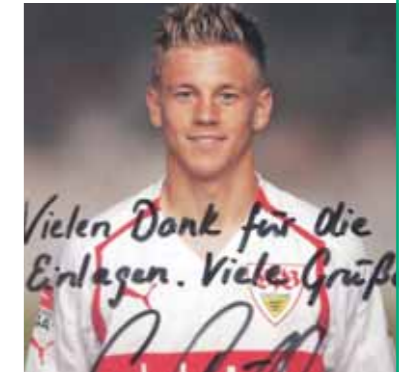

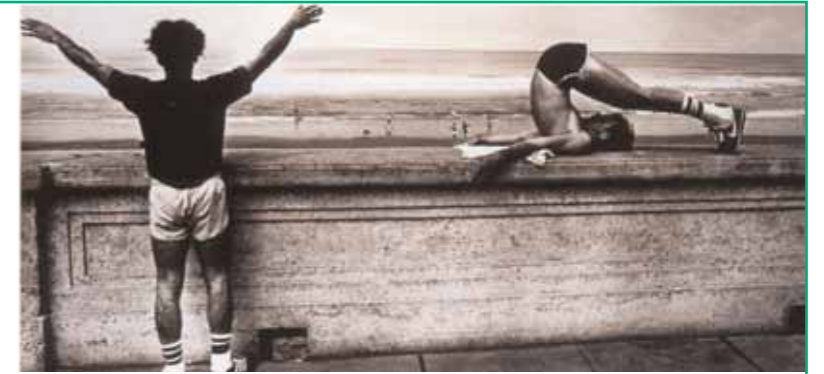

people with both feet firmly on the ground. Whether in daily life, in sport or in the professional arena, Trautmann creates the basis for better feeling feet.

Countless feet have passed through our hands:
big feet, small feet, young feet and old feet.

One trusts in Trautmann – in the professional arena too.

Footballers and volleyball players, runners, track athletes, high jumpers or decathletes, many choose to walk the path to success and a medal with Trautmann.

I learnt it from my father

and he learnt it from his father. And so on – right back to the year 1889.

This is now the fourth generation of active orthopaedic masters.

That's a lot of experience and expertise.

"The Trautmanns", people say, "simply have a way with feet!".

It is certainly true that an instinct for identifying the weak point and then for providing exactly the right help runs in the blood.

Customised relief for better walking, running and standing – that's what the name Trautmann stands for.

We know where it hurts and how to make it better.

With 55 foot specialists in four branches, Trautmann looks after better feeling feet.
